

HYDRUS 
IRRI-Gator

Irrigation Components International released its line of irrigation duty tires and wheels in 1999. These high quality tires have been sent to center pivot manufacturers and distributors in Australia, Argentina, Saudi Arabia, Egypt, Spain, Portugal and the USA with excellent results.

We are providing the market with the most popular sizes used on center pivots. This includes the 11.2 x 24, 14.9 x 24 and 11.2 x 38. All of our tires are 6 ply rated and tube type. The IRRI-Gator tire has an R-1 Irrigation tread. Our tire and wheel assemblies are mounted left and right, please specify this and the offset of the wheel when confirming your order.

Our wheels are all hot dipped galvanized and incorporate the **unique valve stem guard**. This valve stem guard protects the valve stem from field debris and is standard on the IRRI-Gator wheel. We provide the 8 x 24, 10 x 24, 12 x 24 and 10 x 38 wheels. These heavy duty wheels are provided in the Standard and Valley style offset. Please specify the offset when confirming your order.

ICII/P/N	Description
PV00040	11.2 x 38 – 6 Ply, Tire with tube, mounted on a 10 x 38 Galvanized wheel
PV00010	14.9 x 24 – 6 Ply, Tire with tube, mounted on a 10 x 24 Galvanized wheel
PV00012	11.2 x 24 – 6 Ply, Tire with tube, mounted on an 8 x 24 Galvanized wheel
PV00013	11.2 x 38 – 6 Ply, Tire, tube type, tire only
PV00014	14.9 x 24 – 6 Ply, Tire, tube type, tire only
PV00015	11.2 x 24 – 6 Ply, Tire, tube type, tire only
PV00016	10 x 38 Galvanized wheel, Standard and Valley style offsets
PV00017	10 x 24 Galvanized wheel, Standard offset
