

SURESEAL SAVES TIME AND MONEY FOR THE AGRICULTURAL INDUSTRY

The SURESEAL line of 600V UD cables takes the worry out of burying or installing cable. SURESEAL provides the best self-sealing protection from routine dig-in punctures, adjacent utility work damage, installation damage, or damage caused by voltage surges.

Now there's something you can do to prevent unplanned maintenance and costly failures with the use of Southwire's SURESEAL.

- Prevents failure in 600V underground service cables
- Self-sealing insulation reduces callbacks from dig-in punctures and handling damage
- Cost-effective protection delivers savings over copper tray cable or conduit alternatives
- Direct replacement for conventional cables
- Field-tested, proven self-sealing delivers long-term reliability
- Extensive research confirms sealant's capacity to block moisture ingress
- Compatibility with conventional connectors and tools assures efficient installation
- Increased reliability improves ROI on underground services
